- 60 Pre-baiting Points Located at strategic areas to reduce the potential displaced Rodent Population on Clearance. These will be re-baited weekly until Clearance work begins
- Once Clearance Work Begins Baits are relocated to give a Boundry Baiting protection. This will offer protection From rodents leaving site once clearance work begins. Baits will be recheck every 4 weeks and baited accordingly.

Baiting points and process will remain under review throughout works in order to give the most effective Control of rodents
